

Product Information

HOWARU® Restore - capsules

Target Audience

Adults and seniors suffering from gut microflora disruptions caused by the stresses of everyday life - antibiotic usage (>900M per year globally), poor diet, travel, etc...

Dose

40B CFU/day

Composition

- *Lb. acidophilus*
- *Lb. paracasei*
- *Bif. lactis* (2 strains)
- *Bif. bifidum*

50% Bifidobacteria : 50% Lactobacilli

- Microcrystalline cellulose
- Silicone dioxide (processing aid)
- Magnesium stearate (processing aid)
- Hydroxypropylmethyl cellulose (HPMC) capsule

Documentation

Randomized, double-blind, placebo-controlled human clinical study conducted at Washington University in St. Louis, MO. Principal investigator was Dr. Joshua Korzenik.

Positioning

Doctors and dieticians typically recommend yogurt to overcome the negative gastrointestinal drawbacks of antibiotic therapy. Yogurts may not contain probiotics and those that do, along with most probiotic supplements, contain a dose far lower than that delivered by HOWARU® Restore.

In addition, few yogurts and probiotic supplements possess clinical documentation of efficacy in gut microflora restoration. Danisco's HOWARU® Restore is a five-strain probiotic blend clinically documented to rapidly maintain and restore overall gut microflora and bifidobacteria levels during and after antibiotic therapy.

Delivery

20B CFU/capsule. Recommended 2 capsules daily.

Samples

Available upon request.

Packaging material

Product is packaged in multilayer, ultra-high barrier foil film which is heat-sealed and placed inside a fiberboard shipper.

Packaging Sizes

15,000 bulk capsules contained in a cardboard shipper. (35.6cm x 34.3cm x 33cm)

Shipping

Shipping available worldwide.

It is recommended that a shipment of capsules occurs under refrigeration to avoid exposure to extreme high temperatures during transit, especially during the summer months.

Support Documentation

GMP, HACCP, MSDS
